-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (AAPA) in view of US2003/0171948.

AAPA as found on page 3, lines 6-27 of the specification, discloses a method of converting an original product into a modified product.

AAPA fails to teach the steps of applying over the product label a conversion label, the conversion label defining a cut-out portion disposed to permit viewing of the one item of permanent information on the original product label; and applying to the conversion label at least one item of information unique to the modified product.

'948 teaches the steps of applying over the product label a conversion label, the conversion label defining a cut-out portion disposed to permit viewing of the one item of permanent information on the original product label; and applying to the conversion label at least one item of information unique to the modified product (Fig. 4; paragraph [42]).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the steps of applying over the product label a conversion label, the conversion label defining a cut-out portion disposed to permit viewing of the one item of permanent information on the original product label; and applying to the conversion label at least

Art Unit: 3726

one item of information unique to the modified product, as taught by '948 on the method of AAPA so as to eliminate the need to produce and apply an over label for each product (abstract).

Regarding Claim(s) 2,3,6 and 7, '948 teaches: the one item of permanent information comprises a code representative of the date of manufacture of the original product; the one item of information unique to the original product comprises an original product identification code representative of the configuration of the original product, and the item of information unique to the modified product comprises a new product identification code representative of the configuration of the modified product; the step of applying the conversion label includes the step of adding to the conversion label an indication that the step of converting has been performed by an entity who is authorized to perform such a conversion; and the conversion label is provided with an adhesive backing to facilitate application of the conversion label over the product label.

Regarding Claim(s) 4,5 and 8, step of: utilizing the new product identification code to decrement an inventory count for the new part; utilizing the original product identification code to increment an inventory count for the old part, and utilizing the new product identification code to decrement an inventory count for the new part; and the product label being attached to the original product by means of a plurality of fasteners, and the conversion label is configured to avoid interference with the fasteners are well known in the art and It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ these well known method on the AAPA so as to accurate inventory control and durably attach the labels on the product.

Art Unit: 3726

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John C. Hong whose telephone number is 571-272-4529. The examiner can normally be reached on M-F(07:00-16:30)First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on 571-272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
